

Cabin Charter Air conditioning hours of operation.

The standard hours of operation for air conditioning aboard our worldwide cabin cruise program is from 8 am to 10 pm. Air conditioning is not operated outside of these hours as standard in order to keep generator and associated noise to a minimum. The Generator and Air Conditioning can be run outside of these hours only with the written consent of all passengers on board. By agreeing to the use of Air Conditioning outside of these hours you are waiving all rights to any claim as a result of noise on board associated with the air conditioning and generator during the night.

The Dream Yacht Worldwide captain has the final right to decide the hours of operation for the Generator and Air Conditioning for the best interests of the yacht and all passengers should any unforeseen events arise.
